

RoIAI™ LAB: TECHNICAL RIDER & ROOM SPECIFICATIONS

Speaker: Dawn Dawson, Subconscious Architect **Program:** The RoIAI™ High-Fidelity Workshop (90 Minutes)

To ensure the **V-A-S Framework™** (Visual, Auditory, Somatic) achieves a **lasting biological lock** for your attendees, please ensure the following technical requirements are met:

1. Visual Requirements (The 8K Blueprint™)

- **Screen:** High-definition LED wall or projection screen (16:9 ratio preferred).
- **Connection:** HDMI or wireless casting capability from a MacBook Pro.
- **Content:** The presentation includes high-resolution 8K imagery and Generative AI rendering. Please ensure the display is color-calibrated for maximum fidelity.

2. Auditory Requirements (The Frequency)

- **Microphone:** One high-quality wireless headset or lavalier microphone (for hands-free movement during the **Somatic Integration** phase).
- **Audio Input:** 3.5mm or HDMI audio out from the laptop. The session includes a custom "Auditory Script" soundscape that requires a professional-grade house sound system with clear low-end (bass) response.

3. Network Requirements (The GPS Input™)

- **Wi-Fi:** High-speed, stable guest Wi-Fi is required for all attendees.
- **Access:** Participants will access a digital **Success Script** template via a QR code. Please ensure any corporate firewalls allow access to Google Workspace or provided URL links (**IT Whitelist available upon request**).

4. Room Configuration (The Success Pods)

- **Seating:** "Cabaret Style" or "Round Tables" are required.
- **Capacity:** 4–6 participants per table. Each table acts as a **Success Pod** (Reality Crew™).
- **Movement:** Dawn requires a clear "runway" or path to move between tables for hands-on coaching during the 30-minute **Performance** phase.

5. On-Site Materials

- **Tabletop:** Please provide one notepad and one pen per person as a backup to the digital templates.
- **Water:** Room temperature bottled water at the lectern and for the speaker.
